### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joerg-Uwe Sziple on May 26, 2006.

The application has been amended as follows:

#### **IN THE CLAIMS:**

Claim 1, line 13, replace "from" with – in –

#### ***Allowable Subject Matter***

Claims 1 – 7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest using at least two reserved blocks of non-volatile memory to update data for the non-volatile memory in the manner claimed. The closest prior art in this case is Applicant's admitted prior art described in the background section of the application where a single reserved memory block is used for temporarily retaining a copy of the block to be updated. Martwick (US Pat. No. 6,493,807) also discloses a method of safely updating a non-volatile memory block by temporarily saving the old content of the block to be

updated in another block. However, neither the admitted prior art nor Martwick discloses using more than one reserved block where a reserved block and the block that is to be updated are erased simultaneously. While erasing multiple blocks in a flash memory is known in the art, simultaneously erasing a block to be updated along with a reserved block to be used to temporally save old data from another block to be updated is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
